Supplement to the

"Proceedings of the Indian Academy of Sciences"

INDEX TO VOL. XLIII—(A)

AUTHORS' INDEX

Anantakrishnan, S. V. and Rao, D. Sethu		The dipole moment of dimethoxy and diethoxy aniline, 99.
Bhagavantam, S. and Murty, Y. Krishna		Temperature dependence of photo-elastic constants in plastics, 203.
Bhonsle, R. V.	..	*See* Ramanathan and others.
Daniel, R. R.	..	*See* Rao and others.
Dave, J. V.	..	On the intensity and polarisation of the light from the sky during twilight, II, 336.
Dave, J. V. and Ramanathan, K. R.		On the intensity and polarisation of the light from the sky during twilight, 67.
Dhar, M. L. and Seshadri, T. R.		Synthetic experiments in the benzopyrone series, LVIII, 79.
Duggal, S. P.	..	*See* Sarabhai and others.
Gupta, S. L.	..	*See* Ramaiah and others.
Joshi, M. C. and Thosar, B. V.		Conveyor belt method for studying short-lived activities: Ag^{108}, Ag^{110} and In^{116}, 255.
Kondaiah, Evani	..	Excited states of C^{12} in the region 11 to 14 MEV. from B^{11} (d, n) C^{12} reaction, 130.
Kotadia, K. M.	..	*See* Ramanathan and others.
Kotadia, K. M. and Ramanathan, K. R.	..	Variation with lunar phase of midday critical frequencies and heights of the F2 layer over Ahmedabad and other low latitude stations, 394.
Krishnamurthi, M.	..	Transmission of ultrasonics through binary liquid mixtures, 106.
Krishnamurti, D.	..	Raman spectrum of magnesite, 210.
Lakshmanan, B. R.	..	X-ray diffraction by binary liquid mixtures: pyridine-fatty acid systems, 152.
Mathews, P. M.	..	Ramakrishnan and Mathews.
Mathews, P. M. and Srinivasan, S. K.		Ordinary linear differential equations involving random functions, 4.
Moosath, S. S.	..	Studies on hexachloroceric acid, II, IV, 220, 272.
Moosath, S. S. and Rao, M. R. A.		Studies on hexachloroceric acid, I, III, 213, 265.

Murty, S. R. K. .. *See* Singh and others.

Murty, Y. Krishna .. *See* Bhagavantam and Murty.

Naranan, S. .. *See* Sreekantan and others.

Narasimhan, M. N. L. .. On the steady laminar flow of certain non-Newtonian liquids through an elastic tube, 237.

TITLE INDEX

Adducts, β-naphthol maleic anhydride, the configuration (Wariyar), 231.

Benzopyrone series, synthetic experiments, LVIII (Dhar and Seshadri), 79.

Chemical reactions, the role of solvent (Padmanabhan), 368.

Clays, Indian, some, mineralogy (Rao), 359.

Cosmic-ray particles, penetrating, angular distribution of, at a depth 103 MWE below ground (Sreekantan and others), 113.

Crystal spheres, the birefringence patterns of (Raman), 1.

Crystals, the physics (Raman), 327.

Cyperene—II, hydrocarbon, infra-red investigations (Narasimhan and Senich), 156.

Difference-Patterson method, an application (Sasisekharan), 224.

Differential equations, ordinary linear, involving random functions (Mathews and Srinivasan), 4.

Dipole moment of dimethoxy and diethoxy aniline (Anantakrishnan and Rao), 99.

Excited States of C^{12} in the Region 11 to 14 MEV from B^{11} (d, n) C^{12} reaction (Kondaiah), 130.

Heterocyclic rings containing nitrogen, studies in the formation, I (Rao and Ratnam), 173.

Hexachloroceric acid, studies, I (Moosath and Rao), 213; II (Moosath), 220; III (Moosath and Rao), 265; IV (Moosath), 272.

Light from the sky during twilight, intensity and polarisation (Dave and Ramanathan), 67; II (Dave), 336.

Light propagation in optically active crystals, phenomenological theory (Pancharatnam), 247.

Midday critical frequencies and heights of the F2 layer over Ahmedabad and other low latitude stations, variation with lunar phase (Kotadia and Ramanathan), 394.

Murexide, decomposition, in acid solutions, kinetics, studies (Ramaiah and others), 286.

Murexide, polarographic studies, I (Ramaiah and Vishnu), 297.

Non-Newtonian liquids, certain, steady laminar flow of, through an elastic tube (Narasimhan), 237.

Nuclear disintegrations produced in nuclear emulsions by α-particles of great energy (Rao and others), 181.

Optical activity, dependence, on chemical constitution, studies, XLIII (Singh and others), 21.

Photo-elastic constants in plastics, temperature dependence (Bhagavantam and Murty), 203.

Physiologically active compounds, search, II (Rao and Sundaramurthy), 149.

Polarographic behaviour of metals in ethanolamines, I (Subrahmanya), 133; II, 383.

Raman spectrum of magnesite (Krishnamurti), 210.

Short-lived activities: Ag^{108}, Ag^{110} and In^{116}, conveyor belt method for studying (Joshi and Thosar), 255.

Short-lived activities, half-lives, with a pulsed neutron source and a ten channel time analyser (Veeraraghavan), 319.

Solar flare of February 23, 1956, great, and associated ionospheric effects at Ahmedabad (Ramanathan and others), 306.

Solar flare type increase in cosmic rays at low latitudes (Sarabhai and others), 309.

Stochastic processes associated with a symmetric oscillatory Poisson process (Ramakrishnan and Mathews), 84.

Tauberian theorems, two, for the Borel transform of a sequence (Vijayaraghavan and Rajagopal), 163.

Transition phenomena at saturation temperature (Vishnu), 46.

X-ray diffraction by binary liquid mixtures: pyridine-fatty acid systems (Lakshmanan), 152.

Ultrasonics, transmission, through binary liquid mixtures (Krishnamurthi), 106.

Uranium (VI), spectrophotometric estimation, by Morellin (Rao and Patel), 276.

Virial problems related to simple wing profiles (Rao), 53.
